

Brite Brazing

Metal Joining Specialists

Who are We?

Located in Cleveland, Ohio, Brite Brazing is a HI TecMetal Group member company offering an array of metal joining services to customers from a spectrum of different markets.

Brite Brazing services include manual metal joining techniques which, depending on the application, can be more versatile than furnace brazing.

Manual joining methods are advantageous because the operator is able to quickly and accurately join metals of different sizes and composition.

Manual metal joining methods offered by Brite Brazing include:

- Brazing - Induction, Torch, & Resistance
- Soldering - All Types of Metals
- Welding - Tig, Mig, ARC Projection, Resistance
- Assembly & Spotwelding Services

Take I-90 to East 55th St. Travel south on East 55th St. and turn right (west) onto Lake Court, one street past the South Marginal.

The plant is the first building on the left (south) side of the street.

Advantages of Manual Joining Methods

- Manual methods are still the solution for many joining problems
- Flexible and accurate techniques
- Allow the operator to selectively join parts of different sizes and composition.
- Heat can be applied selectively or when heating the entire piece is undesirable.
- Productivity is maximized by a fast heat-up cycle.
- Precise techniques well-suited to large production items
- Over 40 years experience
